# RECOMMENDATIONS

1. PrEP available as soon as possible and for free
2. To document PrEP for women and transgender people
3. Don't forget the other strategies and continue investing in them
4. PrEP is a revolution, but need investment / new resources
5. Information and education (key population, healthcare providers)
6. PrEP is not the end of the fight against HIV, in Belgium as in the rest of the world.
