

Dear colleague,

We would like to invite you to participate in a survey focusing on healthcare organisation for aging people living with HIV.

Thanks to the effectiveness of current antiretroviral therapies, people living with HIV are now reaching older ages and can expect a near-normal life expectancy. While this is a major success, it also brings new challenges for healthcare services. Alongside continued attention to HIV, care providers must increasingly address age-related comorbidities and the complex needs associated with ageing.

With this survey, we aim to gain insight into how care for ageing people living with HIV is currently organised within HIV Reference Centres (HRCs) and within the network of BREACH members. Your experience and perspective are essential to help us identify strengths, challenges and areas for improvement.

The questionnaire takes approximately [X] minutes to complete and your responses will be treated confidentially.

You can access the survey via the following link:

<https://forms.office.com/e/gY5FF3Cz6m?origin=lprLink>

We kindly ask you to complete the survey by 21 December 2025.

Thank you very much in advance for your valuable contribution and for taking the time to complete the survey. If you have any questions, please do not hesitate to contact us.

Kind regards,

On behalf of Prof. Dr. Marie-Angélique De Scheerder,

Liesbeth Delesie

Research Assistant

Ghent University Hospital
